

TEAM-BASED CARE IMPLEMENTATION

IMPROVE YOUR ORGANIZATION'S LONG-TERM FINANCIAL SUSTAINABILITY BY INCREASING PHYSICIAN PRACTICE REVENUE, REDUCING PHYSICIAN TURNOVER, ELIMINATING PENALTIES, AND EARNING INCENTIVE PAYMENTS.

Is your organization facing any of the following challenges?

- Participation in risk-bearing payment models (ex. ACO, Medicare Advantage)
- Limited access and patient panel size capacity
- Inadequate number of physicians to serve community
- High provider turnover rates
- Poor financial performance of employed practices
- High medical loss ratio (MLR)
- Failure to achieve clinical quality goals and earn payer incentive bonuses
- Failure to earn shared savings in a Medicare Shared Savings Program
- High opportunity costs (avoidable ED utilization, network leakage, hospital admissions/readmissions for ambulatory-sensitive conditions)
- High Medicare readmission penalties
- Poor patient satisfaction/experience scores

What is team-based care?

- *A restructuring of clinical workflows to promote increased sharing of responsibilities across the entire team, which enhances practice efficiency while improving provider, patient, and staff engagement.*

Here are some of the real-world benefits you and your patients may experience after implementing team-based care:

- Increased practice panel size and increased visit capacity
- Improved performance in value-based payment models
- Long-term financial sustainability of practices
- Reduced total cost of care for the organization
- Reduced readmission penalties; achievement of shared savings and incentive payments
- Reduced physician turnover and burnout
- Increased patient engagement and better clinical outcomes
- More joy returned to the practice of medicine through enhanced collaboration within teams

The Team-Based Care Model is characterized by:

- Co-location of providers and staff within the office
- The “co-visit,” during which the physician performs an exam and interacts with the patient while the MA/nurse documents findings in the medical record in real time

Our team is led by a physician and a clinical operations expert who are on-site and embedded with your practice during the engagement. For more information on how we can help you transform your practice, please contact Heidi Larson, MD, MBA at 207-233-2502 and hlarson@stroudwater.com or Louise Bryde, MHA, BSN, RN at 404-790-8251 and lbryde@stroudwater.com.
